FURNICO

2026 CATALOGUE

FURNICO

With over 20 years of architectural expertise and a team that has collaborated with major hospitality brands worldwide, Temur Architecture has built a strong and reliable foundation that focuses on designing smart and efficient spaces. Through real on-site experience in the hospitality sector, our team identified the key challenges investors face high construction costs, long installation times, and complicated operational processes. This led to the development of FurniCo, a system that provides modular, adaptable, and easy-to-install furniture solutions tailored to the needs of the industry.

FurniCo’s modular furniture packages are designed to reduce operational and construction costs while making the setup phase significantly faster. Each solution can be configured according to room layout, area size, and user requirements. This flexibility ensures that every square meter is optimized, enabling an efficient and well-organized space with minimal effort.

Our systems are not limited to hotel rooms; they can also be seamlessly implemented in:

Student dormitories, Resting rooms for professional teams, Staff or guest accommodations, Healthcare tourism units, Short-term rental spaces

Rather than simply offering furniture, Furnico acts as a solution partner that adapts to each space and enhances its functionality.

As an extension of this approach, we developed an AI-powered furnishing system that plans and automatically furnishes a space in just a few clicks — in 3D and without the need for complex operational management. Even without any technical background, investors and project managers can achieve a complete and optimized room layout within minutes.

FurniCo stand for a new generation production model, combining aesthetics, functionality, speed, and flexibility. Our mission is to reduce the burden on investors, improve the user experience, and maximize the potential of every space efficiently and intelligently.

Lobbies, guestrooms, kitchenette units, outdoor areas, and wardrobe systems... Each space in a hotel has its own unique requirements, and Furnico designs every area with these needs in mind. Our furniture systems integrate seamlessly across different zones, creating a fluid and cohesive spatial experience. From public areas to private rooms, every element is carefully considered to ensure both functionality and aesthetic harmony, allowing hotels to deliver a consistent and refined experience to their guests. Premium materials, sophisticated color palettes, precise craftsmanship, and high durability standards

Furnico furniture is built to last while maintaining elegance and comfort. Every detail is thoughtfully designed, balancing operational efficiency with the expectations of modern travelers. Whether it's a boutique city hotel, a luxury resort, or a large international property, our solutions support both the hospitality staff and the guests, making spaces practical, inviting, and memorable.

Furnico does more than produce furniture – we create environments. Our designs give hotels their distinctive identity, atmosphere, and style, shaping guest experiences that are both timeless and meaningful. We combine innovation, material excellence, and thoughtful design to help every hotel tell its own story, leaving a lasting impression long after guests have checked out.

FURNICO DECK FAMILY 2026

DECK FAMILY

The Deck Collection finds its muse in the rigorous, yet elegant, geometry of contemporary architecture and industrial design. The angular metal profile is not just a style choice; it represents a commitment to engineered durability and a distinctive, high-end signature look. The use of walnut MDF ensures longevity and a luxurious finish that performs flawlessly in demanding hospitality environments. Most importantly, we value functional flexibility. By including key pieces that are easily adaptable to different room layouts or guest requirements, the Deck Collection maximizes the efficiency and versatility of the space, offering guests a truly modern and comfortable experience.

INSPIRATION

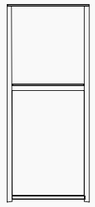

The Deck Collection is anchored by the values of Geometric Integrity and Adaptive Utility. The Deck Collection stands for furniture that is not only visually powerful but also responsibly built to withstand the demands of a high-traffic environment while maximizing operational efficiency.

VALUES

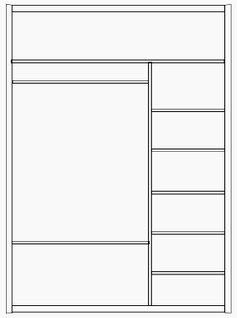

The Deck Collection finds its inspiration in the strength and purposeful structure of classic naval architecture, the interlocking beams and directional lines of a ship's deck. We aimed to capture the essence of forward motion and engineered resilience. The signature 45-degree angle of the oval metal profile is a deliberate design choice that imparts dynamic tension, suggesting movement even in a static object.

DECK LIVING

The Deck Living area is designed to provide all customers with an equally comfortable experience, matching the standard of a first-class stay. This consistent quality is ensured by its durable materials and strong construction.

Paint Feature & Color Options

Our products are coated with electrostatic powder paint, a durable and eco-friendly method. The metal surface is first cleaned and degreased to ensure proper adhesion. The powder is electrostatically applied and then cured in a high-temperature oven, forming a smooth, even, and highly resistant finish. This coating offers excellent protection against corrosion, UV rays, scratches, and outdoor conditions.

Material Feature & Color Options

Our MDF panels are laminated with melamine-coated decorative paper and produced with CII-grade, formaldehyde-free core material. This ensures a safe and sustainable solution for indoor furniture. The surface is scratch-resistant, easy to clean, and color-stable, while the dense fiberboard core offers high durability and structural integrity. Ideal for environmentally conscious interiors and long-term use.

MEDIA WALL PANEL

Thanks to its curved surface and flexible channel structure, this wall panel offers perfect fit and ease of use. Its aesthetic and functional design creates stylish and comfortable spaces. The panel can be used as a decorative wall or as a TV back panel, and its special structure allows neat and safe routing of electrical cables.

The Modular Headboard Panels are designed in four different sizes, each dimension following the next in a seamless sequence. When electrification is added, the previous and larger module become level, ensuring full alignment between all sizes. This smart system enables unlimited layout variations, allowing the panels to be adapted to any space effortlessly. Offering both functional and aesthetic flexibility, the modular structure supports countless configuration possibilities and personalized design scenarios.

DECK LAYOUT

DECK LAYOUT

FURNICO CALM FAMILY 2026

CALM FAMILY

Crafted from high-quality melamine-coated MDF, The CALM masterfully blends the earthy elegance of travertine and the comforting warmth of natural oak textures. The signature bed features a beautifully upholstered headboard with a soft, enveloping curve. Both the desk and minibar are designed with hidden shelves at the back of their rear-facing sides. These spaces provide the perfect, clutter-free area for guests to place menus, personal items, or small trinkets, while also offering seamless cable management for all electrification needs.

INSPIRATION

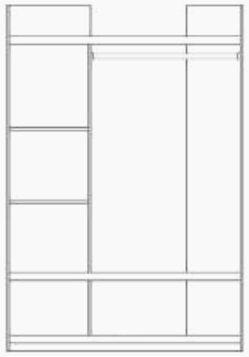

The CALM Collection finds its core inspiration in the quietude of a retreat, drawing directly from the soothing power of natural elements and soft, ergonomic forms. The collection's key design motif; the soft, continuous curve seen as quarter-rounded edges of the surfaces—is inspired by the nature itself.

VALUES

The design and construction of the CALM Collection are guided by a dual commitment to honest aesthetics and functional integrity. By utilizing high-quality melamine-coated MDF with hyper-realistic textures, we provide a product that is both visually luxurious and built for longevity, ensuring maximum value through robust construction and intuitive design.

This coating offers excellent protection against corrosion, UV rays, scratches, and outdoor conditions.

Material Feature & Color Options

Our MDF panels are laminated with melamine-coated decorative paper and produced with CII-grade, formaldehyde-free core material. This ensures a safe and sustainable solution for indoor furniture. The surface is scratch-resistant, easy to clean, and color-stable, while the dense fiberboard core offers high durability and structural integrity. Ideal for environmentally conscious interiors and long-term use.

FURNICO MONA FAMILY 2026

MONA FAMILY

The Mona Collection embraces the timeless appeal of natural materials, built entirely from high-quality MDF panels finished with a realistic natural oak melamine coating. What distinguishes Mona is its innovative and stabilizing foot structure: the base of each piece is defined by inwardly angled diagonal panels.
Beyond its aesthetic contribution, this diagonal placement significantly enhances the stability and durability of the furniture, ensuring robust performance alongside its warm, inviting design.

INSPIRATION

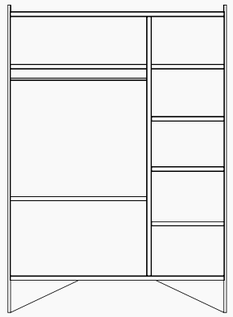

The inspiration for Mona is drawn from the concept of balanced support and the enduring beauty of classical joinery methods, reinterpreted for modern manufacturing.

VALUES

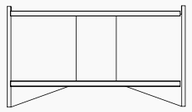

We value delivering a collection that provides superior performance and a strong return on investment for the hospitality operator. The design's innovative inward-angled diagonal foot structure is not merely aesthetic; it is engineered for enhanced stability and load-bearing capacity, drastically reducing the likelihood of structural failure and replacement costs over time.

FURNICO MONA FAMILY 2026

MONA LIVING

The MONA Living area is designed to provide all customers with an equally comfortable experience, matching the standard of a first-class stay. This consistent quality is ensured by its durable materials and strong construction.

Paint Feature & Color Options

Our products are coated with electrostatic powder paint, a durable and eco-friendly method. The metal surface is first cleaned and degreased to ensure proper adhesion. The powder is electrostatically applied and then cured in a high-temperature oven, forming a smooth, even, and highly resistant finish. This coating offers excellent protection against corrosion, UV rays, scratches, and outdoor conditions.

Material Feature & Color Options

Our MDF panels are laminated with melamine-coated decorative paper and produced with CII-grade, formaldehyde-free core material. This ensures a safe and sustainable solution for indoor furniture. The surface is scratch-resistant, easy to clean, and color-stable, while the dense fiberboard core offers high durability and structural integrity. MEDIA WALL PANEL

Thanks to its curved surface and flexible channel structure, this wall panel offers perfect fit and ease of use. Its aesthetic and functional design creates stylish and comfortable spaces. The panel can be used as a decorative wall or as a TV back panel, and its special structure allows neat and safe routing of electrical cables.
